

CHEMICAL STORAGE

LAB SAFETY AWARENESS WEEK

**THE BEST PRACTICES FOR CHEMICAL STORAGE
ARE CRITICAL TO ENSURE LAB SAFETY.**

**MAINTAIN THE SAFE AND RESPONSIBLE USE OF
CHEMICALS AND CHEMICAL WASTE**

- Always consult a Safety Data Sheet (SDS) for proper storage and segregation of chemicals and chemical waste.
- Store chemicals by compatibility and not by alphabetical order, except within each hazard class.
- Store flammable chemicals in flammable cabinets. Ensure containers are in good condition.
- Ensure that ALL chemicals are labeled with the full name and hazards.
- Review the SDS to ensure proper PPE is available. Keep the Pitt Community safe and be prepared for emergencies.
