

Pedestrian Exclusive Phase

What is it?

- Signal phasing that allows pedestrians to cross any leg of the intersection, including diagonally, freely
- All vehicular signals are red
- All pedestrian signals show “WALK”
- Increases pedestrian safety by removing conflicting vehicular movements
- Improves vehicular traffic flow during green lights

How to Use

This pedestrian exclusive phase will occur during every cycle, regardless of whether the button is pressed

Pedestrian Phase

- Pedestrians cross ONLY on a walk sign
- Drivers are prevented from proceeding or turning right on red

Vehicular Phase

- All pedestrians WAIT during vehicular movement
- Vehicles may move freely during this phase

PEDESTRIANS MUST WAIT FOR ‘WALK’ SIGN TO CROSS

This installation is a fall 2025 pilot and will be reevaluated after a trial period.
